

**Dose Response Specialty Group, SRA**  
**February 6, 2007**  
**Meeting Notes**

1. Minutes from the annual meeting (Linda Teuschler)

Reviewed and accepted. Linda to send to Paul Schlosser for posting.

2. Draft updates to the DRSG web site (Dale Hattis)

Updates made by Paul Schlosser. Need to update by-laws. Links to the 2006 minutes are not working.

Student awards section needs to be updated by Paul Feder with 2007 dates.

Peter McClure's poster is on website. Student award winners could be highlighted.

John Lipscomb to take poster to SOT – Peter will remind him.

3. Planning for organizing symposia for the next annual meeting.

A. Uncertainties in Cancer Risk Assessment (Doug Crawford-Brown, Dave Gaylor, Ken Bogen, D. Hattis, Others?) Dale Hattis trying to organize this symposium to talk about a series of white papers on this topic. These 4 speakers are confirmed. Dale is checking with George Gray. Send ideas on other participants to Dale

B. Other possibilities?

- Development in applications of benchmark dose. Topics could include: update on guidelines; case studies on specific applications; presentation of different new models; model averaging; (Gary Foureman - Group thought he should go ahead with organizing this.)
- Individual differences in susceptibility, particularly with respect to aging, what are the vulnerabilities, concept that variability goes up with age, so how protective are the uncertainty factors to account for differences in susceptibility, what's known from laboratory research and from epidemiologic research, historical treatment of intraspecies variability – Steve Lewis good on this topic, presentation on variability in exposures in the aging population, differences in PK and PD, how to use info in risk assessment and risk management – Gary Ginsburg, (Bob McPhail)

4. Extra \$\$

A. From SRA Annual Meeting, Ideas were solicited for spending extra \$\$

- an additional student award (Dale Hattis)
- pay travel for invited speakers outside of SRA members (Dale Hattis)
- use for upcoming World Congress/International SRA meeting (Mike Dourson)

- B. Gary Foureman – likes idea to use this for invited speakers. Use it to pay registration for speakers – one sponsored registration per symposia, could pay for only one day's registration
- C. More generous student award could be given. Need to know exact budget. Linda to check with Lori Strong of SRA – send email to executive committee when she gets budget.
- D. Side issue – SRA to send student awards out from 2006 meeting – Linda check with Lori Strong on this. Joshua Harrill, Rebecca Clewell

5. Group representation at the planning committee meeting (likely June)  
Rep for SRA planning meeting for our symposia submissions, acceptance/rejection, oral vs. poster presentations, what day of week presentations are given. Dale Hattis will do this unless someone else volunteers.

6. Liason with the publications committee that runs Risk Analysis.  
Dale Hattis to find out duties and report back to group so we can get a volunteer.

7. Teleseminars (Sarah Henry)

March Teleseminar will be - Dan Doerge of FDA, pk modeling of acrylamide  
Ideas from Dec Annual Meeting

- Probabilistic risk assessment for data derived uncertainty factors (John Lipscomb)
- Hormesis Society talk on dose-response assessment (Mike Dourson)
- Expert elicitation (?)
- Radiation dose-response (?)
- Nanotechnology dose measurements (?)

To follow up with Sarah Henry on this.
