

**Dose Response Specialty Group, SRA
May 2, 2006 – Meeting Notes**

Present: Justin Teeguarden, Chair, Sara Henry, Sec'y-Treas., John Keller, Dale Hattis, Paul Feder, Gary Foureman, Mike Dourson, Ralph Kodell.

Student Award

John Keller objected to the SOT policy as stated by a staff person that SOT does not cooperate with other professional groups, and therefore, will not advertise DRSG's student award. He will check further on this matter.

The American Statistical Association will advertise our student award, as will the Biometrics Society. The advertising should take place within the next three weeks, suggested Justin T. He will check with CIIT regarding additional funding for the student award. There was discussion regarding contacting academic institutions about the award.

Teleseminar Program

The teleseminar for June 6 arranged by Dale Hattis will be Joann Schotkin from Cadmus Associates and Dr. Rob Mercer of NIOSH speaking on nanotechnology, toxicology, exposure and risk assessment issues.

Annual Meeting

There was discussion of a symposium at the SRA meeting on uncertainty factors. Justin T. is arranging this symposium with Dale Hattis as a possible participant. The component of uncertainty due to pharmacokinetics and to pharmacodynamics will be one topic.
